

V2C

CHARGING UP

YOUR TOMORROW

EV PORTABLE. Charge wherever you want, at full power.

Compact and fully portable. Travel with peace of mind. Charging everywhere has never been so easy.

Don't change your route anymore! EV Portable is a light and compact e-Charger, very easy to transport. Its ability to charge at maximum power makes it your essential travel partner.

With EV Portable you can control the charge wherever you go. Change speed and power output, and check the information in real time thanks to its integrated LCD Display.

The portable e-Charger of V2C is compatible with several accessories or adaptors to facilitate its use wherever and whenever you want. Save space and time. Travel worry-free.

EV PORTABLE CHARACTERISTICS

The perfect mix between lightweight and power: even with its compact dimensions, it can reach a maximum charge power of 32A (22kW).

Ultra-resistant: built with ABS plastic, a highly resistant material.

Manually set the power limit and check all the charging information on the built-in LCD Display.

Compact and lightweight. Take it always with you.

ULTIMATE ADAPTABILITY

It can be customized with various accessories for power connection. Choose the one which adapts the most to your needs.
